Education

FPT University
Software Engineering
2024 – 2028

Programming Skills

- Java /SQL
- HTML/CSS
- JavaScript
- React/Spring Boot
- C#/C/C++

Frameworks & Tools

- Basic Spring Boot
- Basic React
- Spring Data
- CSS
- SQL Server 2022
- MapStruct, Lombok, JWT
- Git, Maven, npm, Postman
- Draw.io, PlantUML

Soft Skills

- Communication
- Problem Solving
- Teamwork
- Git Management & code review
- Technical Writing
- Self-learning new technologies

CAREER OBJECTIVE

A Software Engineering student at FPT University, seeking an Intern position as a Backend or Full-stack Developer. Although recently introduced to technologies such as Spring Boot, React, and C#, I have successfully self-taught and applied them in practical academic projects. I am looking for a professional internship environment to gain hands-on experience, hone my coding skills, and contribute my system analysis and API design abilities to the collective work of the company.

PROJECTS

RMS — Restaurant Management System

Project (In Progress)

- **Frontend (Using React 18):**
 - *Cashier POS*: Designed and developed the Cashier Dashboard interface, managing table status grid (available/occupied) and item list in the cart.
 - *Payment & Menu*: Built the Payment Modal (virtual numpad, QR code, auto-calculated VAT receipt) and Public Menu showcasing food categories with smooth scrolling effects.
- **Backend (Using Java 21, Spring Boot 3.2):**
 - Responsible for designing API documentation for multiple endpoints of the module across all 3 iterations. Currently finished coding 6 REST APIs for QR-based ordering and order management.
 - Contributed to designing the overall ERD and Database schema of the project for all 3 iterations.
 - Applied the Controller → Service → Repository architecture, separating Entity/DTO using MapStruct.
 - Used `ApplicationError` enum and `GlobalExceptionHandler` for centralized error handling.

Tech: React, Java, Spring Boot, SQL Server, JWT

 **Source code:** github.com/lam431826/restaurant-management-system

TECHNICAL KNOWLEDGE

- **Frontend:** Basic knowledge of React hooks, TypeScript, and UI development with Tailwind CSS.
- **Backend:** Understanding of RESTful API design principles, basic JWT authentication, and using Postman for API testing.
- **Database & Analysis:** Capable of designing Schemas, JPA mapping, drawing Use Case diagrams, and preparing PRD documents.

TEAMWORK & GIT MANAGEMENT SKILLS

- **Secretary & Documentation Role:** Took notes and recorded instructor feedback during class; proactively updated features and personal API documentation into the team’s shared README.
- **Use Case & Database Design:** Analyzed requirements and drew Use Case diagrams for the assigned module. Actively discussed and contributed to the overall ERD/Database design of the system.
- **Git Management:** Applied Git Flow and Conventional Commits guidelines, created a Pull Request template to support code review before merging.

CERTIFICATIONS

- **IELTS 5.0**
- **Coursera:**
