

NGUYEN QUANG HUY

Software Engineer | Backend & Full-Stack Developer

0334396608 | nguyenquanghuy200612@gmail.com | github.com/NhoCutee | Portfolio: meobone.is-a.dev | Hanoi, Vietnam

EDUCATION

FPT University

Bachelor of Science in Software Engineering – GPA: 3.0 / 4.0

Hanoi, Vietnam

2024 – 2027

WORK EXPERIENCE

VNPT Media

Software Engineer Intern

Hanoi, Vietnam

Jul 2026 – Present

- Engineered backend microservices and RESTful APIs for digital media platforms using **Java**, **Spring Boot 3**, and **PostgreSQL**.
- Implemented inter-service RPC communication via **gRPC** and Protocol Buffers, cutting serialization overhead compared to HTTP REST.
- Integrated **RabbitMQ** message broker to decouple event-driven background processing (notification delivery and audit logging).
- Deployed **Redis** as a distributed cache and session store, reducing database read queries and optimizing API response times.
- Configured containerized multi-container runtime environments using **Docker** and **Docker Compose** for local staging and testing.

PROJECTS

SnapLink – High-Performance URL Shortener | *Next.js 15, TypeScript, PostgreSQL (Supabase), Docker* [\[Live Demo\]](#)

- Architected a low-latency URL shortening engine combining **SHA-256 digest** and **Base64URL encoding (RFC 4648)** with canonicalization (RFC 3986).
- Implemented an idempotent deduplication algorithm preventing duplicate DB storage for identical long URLs.
- Optimized PostgreSQL B-Tree Primary Key indexing and direct connection pooling, securing **sub-50ms HTTP 302 redirects**.
- Dockerized the deployment with a multi-stage **Dockerfile (Node 22 Alpine)** ensuring isolated, reproducible environments.

RMS – Restaurant Management System | *Java 21, Spring Boot 3, React 18, PostgreSQL, JWT, Tailwind CSS* [\[GitHub\]](#)

- Developed a full-stack dining management platform featuring dynamic QR table ordering and a real-time Kitchen Display System (KDS).
- Co-designed the relational database schema and applied the **Controller → Service → Repository** pattern with **MapStruct** DTO mapping.
- Engineered 6+ core REST APIs and enforced global exception handling with **@RestControllerAdvice** and **ApplicationError** enums.
- Built the Cashier POS Dashboard and order cart UI with **React 18** and **Tailwind CSS**, streamlining table billing.

Interactive Developer Portfolio & Web Showcase | *Next.js 15, React 19, TypeScript, Tailwind CSS, Motion*

- Built a personal platform using **Next.js 15 App Router** and React Server Components for minimal client-bundle overhead.
- Crafted accessible, fluid UI micro-interactions integrating **Radix UI headless primitives**, **Motion**, and Lenis smooth scrolling.
- Audited and optimized Core Web Vitals, achieving a **Largest Contentful Paint (LCP) under 1.2s** through asset preloading and dynamic imports.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL, C/C++, HTML/CSS

Backend Development: Spring Boot 3, Spring Data JPA, RESTful API, gRPC, RabbitMQ, Redis, JWT, MapStruct, Lombok

Frontend Development: Next.js 15, React 18/19, Tailwind CSS, Radix UI, Motion

Databases & DevOps: PostgreSQL, SQL Server, Supabase, Docker, Docker Compose, Git (Git Flow), Maven, Postman, Linux
